Seaman Engineering Corporation

Seaman Engineering Corporation (SEC) was founded over 25 years ago to meet the needs of clients who desire a company, which can provide coordinated, timely and competitive full service engineering capabilities. We offer in-house fire suppression, plumbing and HVAC services, and out-source electrical needs, when required. SEC is attentive to client's needs and budgetary constraints in formulating creative designs and solutions to complex projects. SEC offers a broad spectrum of services including master planning, building system audits, design, energy/operating cost analysis and quality assurance reviews. Our firm has a total company staff of eleven (11) which includes two (2) registered professional engineers, one (1) LEED® accredited professional and a field engineer who carries a Master Sheet Metal Workers License.

HVAC, Plumbing & Fire Protection

HVAC

- Building Surveys and Energy Modeling
